# XDROO SERIES **XBOOST**

**Variable speed  
booster sets**

## PRESENTATION

**HYDROO** has set up a worldwide distribution network with key partners and is providing value to pump engineers and end users. We have an extensive pump portfolio with high-end solutions for many applications, including water-supply booster sets, fire-fighting equipment, borehole, HVAC, drainage and sewage, utilities, irrigation, desalination and RO equipment, and OEM integration, among many others. We provide solutions for all markets for 50 Hz and 60 Hz, including customized versions.

**HYDROO** has a factory in Palol de Revardit (Catalonia- Spain). It's been sized to guarantee our reliable, long-term, personalized manner and offer the best service to all our customers. We provide a wide range of products in an extremely short delivery time, thanks to our Lean manufacturing processes and our qualified professional and enthusiastic team.

Our commitment to ethics and legislation in relation to third parties is compiled in a public document of principles. The document has been agreed upon by the entire Hydroo team and its implementation is being coordinated by a committee to ensure the compliance and strengthening of the corporate culture in the whole company.

The expansion of Hydroo is based on excellence in operations and a successful business relationship with partners. Therefore, we face a strong growth in the target market. We are fully audited by SGS for ISO9001 and ISO14000 standards annually.

At HYDROO, we are committed to providing excellent service to our valued pump partners.

# Hy5 commitment

Global water challenges require excellence in pumping technologies and close cooperation between pump designers, manufacturers and pump engineers.

In order to meet our customers' needs in the most demanding pump installations, we are firmly committed to designing and manufacturing the best pumps in the market.

Therefore, we have our own open and public Hy5 commitment, which is summarized in 5 main values:

Highest pump performance is related to the detailed design of the motor and the hydraulics. We use high-end technical resources to reach the best-in-the-market results. Maximized hydraulic efficiency and IE3 standard motors achieve a unique leading pump concept: robust, reliable, flexible, user-adjustable, smart and multi-purpose.

Added value relies on the selection of material, the industrial process of the components production and the usable design of all the individual details. Pump flexibility, high line-up of options and personalized service are our added value.

Quality assurance is a key factor for added value products. Monitoring the pump quality, the crafted manufacturing processes and expedition quality are integrated in our core service offer. Moreover, variable frequency drivers are available to get the best pump service in any kind of installation. The world is constantly evolving and we contribute towards this with warmth and commitment.

The environment is at the core of our company philosophy. All processes consider the minimum impact in our own home. Within our designing processes, we take into account all individual requirements to get the best results and the lowest impact on the environment.

We take care of our customers' pumps. We are our customers' factory and they deserve our full commitment to excellence and exemplary corporate culture. We consider no boundaries within the value chain, from industrial installation engineering to pump managing. This vision results in a close cooperation with all players to get the best pumping solution.

# XBOOST

## Variable speed booster sets

### Applications

- Water supply for residential & public buildings**
- Garden irrigation**
- Water supply for industrial uses**
- Other applications**

### Description

This variable speed PID controlled booster system is a sophisticated system, composed of latest technology PID variable speed control cabinet and from two to four sets of parallel pumps. It can be automatically adjusted to fulfil the requirement of constant pressure, variable flow water supply. The pressure of the water supply pipe network keeps constant, and the whole water supply system always keeps the best state of high efficiency and energy saving. There are two types of water supply and the most efficient one is driven by a variable frequency device that automatically adjusts the rotation speed of the pumps; unlike equipment with accumulation or hydropneumatics where pumps start or stop without a demand regulated operation. XBOOST is the best way to keep the pressure of the pipes constant and is very easy to operate and program setting. Many other requirements are available in terms of materials, connection types, accessories and special features.

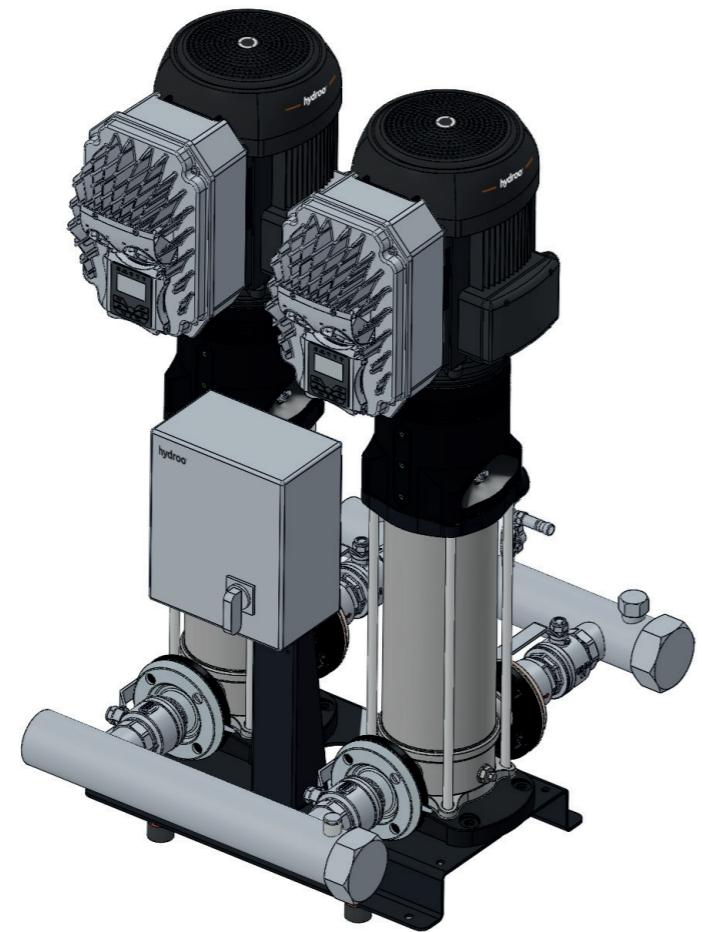

### Performance range

**Flow range:** 0.4 ~ 1440 m<sup>3</sup>/h

**Head:** 4 ~305 m

**Temperature:** 0 °C ~+70 °C

**Voltage:** 220V/380V

### Pump

VDROO is a kind of vertical non-self priming multistage centrifugal pump, which is driven by a standard electric motor. The motor output shaft directly connects with the pump shaft through a coupling. The pressure-resistant cylinder and flow passage components are fixed between pump head and inlet&outlet section with stay bolts. The inlet and outlet are located at the pump bottom at the same plane. This kind of pump can be equipped with an intelligent protector to effectively prevent it from dry-running, out-of-phase and overload.

### Motor

Full-enclosed efficiency standard motor air cooled according IEC634-2014  
Protection class:IP55  
Insulation class: F  
Standard voltage: 50HZ:

1x230V  
3x230/400V  
3x400/690V

### Application

VDROO is a kind of multifunctional products.

It can be used to convey various medium from tap water to industrial liquid at different temperature and with different flow rate and pressure. VF type is applicable to conveying non-corrosive liquid, while VX,VN is suitable for slightly corrosive liquid.

**-Water supply:** Water filter and transport in waterworks boosting of main pipeline, boosting in high-rise buildings.

**-Industrial boosting:** process flow water system, cleaning system, high-pressure washing system, fire fighting system.

**-Industrial liquid conveying:** Cooling and air-conditioning system, boiler water supply and condensing system, machine-associated purpose, acids and alkali.

**-Water treatment:** Ultra filtration system, reverse osmosis system distillation system, separator, swimming pool.

**-Irrigation :** Farmland irrigation, spray irrigation, dripping irrigation.

### Product range

Description	VDROO-1	-3	-5	-10	-15	-20	-32	-45

VF, VX, VN Oval Flange	G1	G1	G1½	G1½				

### Standard material

Cast iron.

SS304 wet parts.

SS316 wet parts.

### Operation conditions

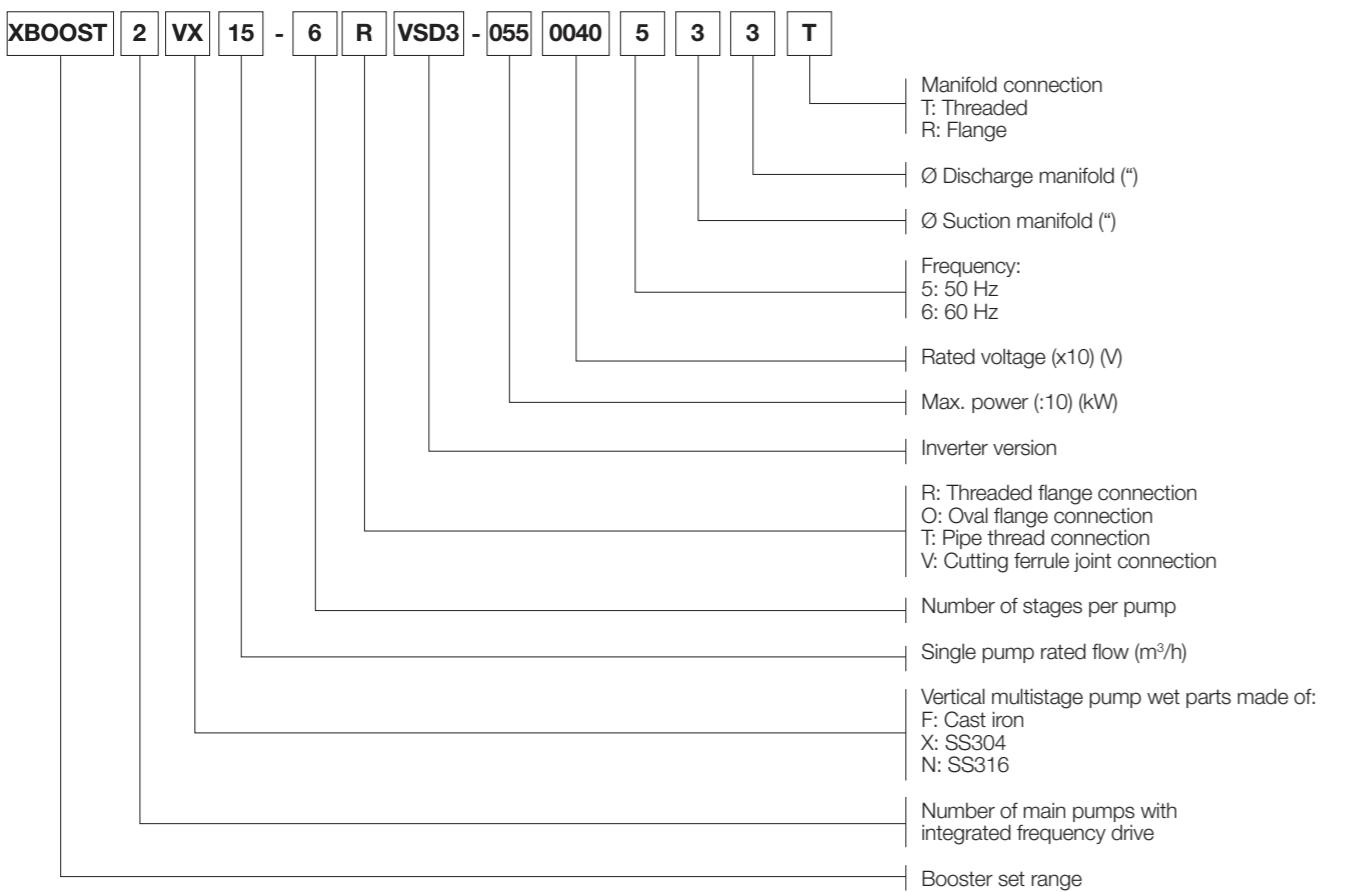

-Thin, clean, non-flammable and non-explosive liquid containing no solid granules and fibers.

-Liquid temperature: -15°C +120°C

-Ambient temperature: up to +40°C

-Altitude: up to 1000m

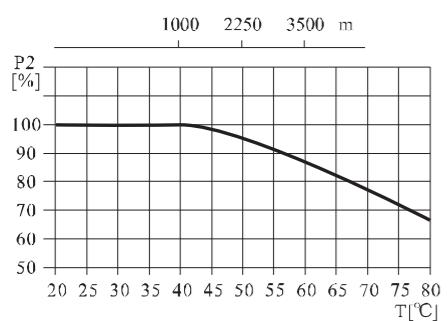

## Definition of model

\*For special applications please contact our AED department.

## Max. Ambient temperature

When the pump operates under ambient temperature higher than 40°C or at altitudes higher than 1000m, because of low air density and poor cooling effects, the motor output power P2 will be decreased to certain extent. If the pump is operated under the above-said conditions, it should be equipped with motor of higher power.

## Max. working pressure

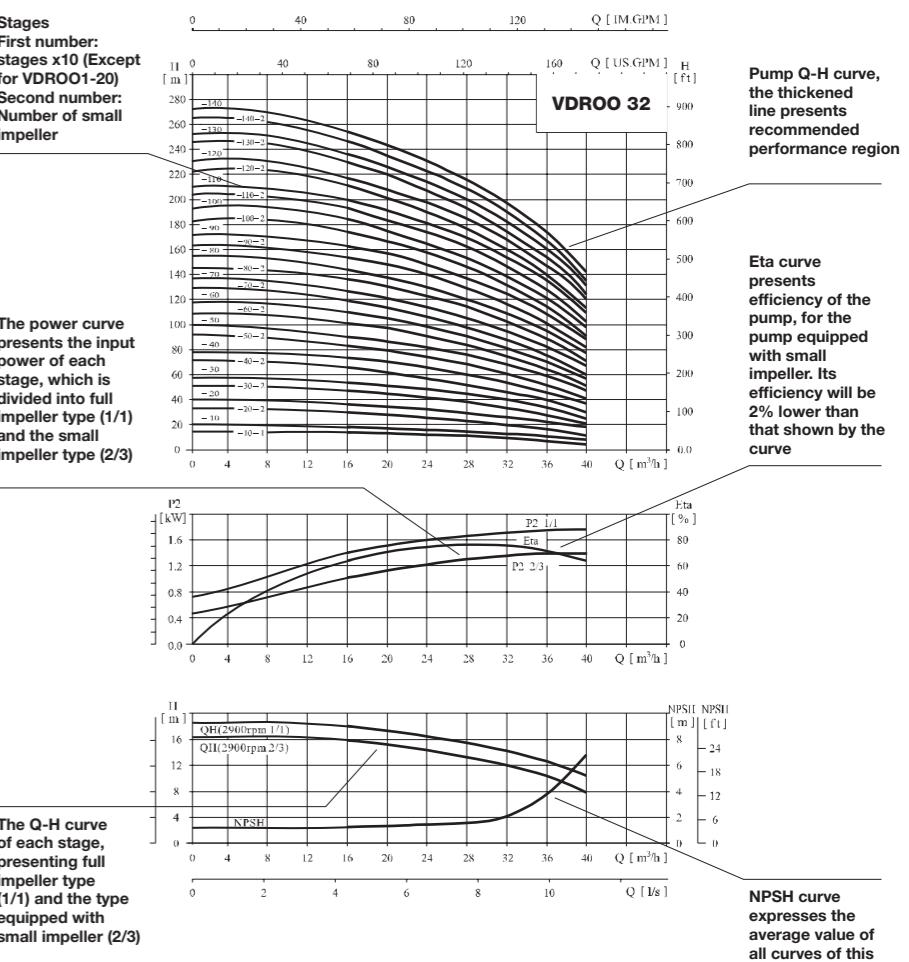

Model	Max. pressure (bar)
VF, VX, VN 1,3,5,10,15,20 Flange, cutting ferrule joint, pipe thread	25
VF, VX, VN 1,3,5,10 Oval Flange	16
VF 32-10-1 ~ 32-80	16
VF 32-90-2 ~32-160	30
VX, VN, VD 32	30
VF 45-10-1 ~45-60-2	16
VF 45-60 ~45-90	25
VF 45-100-2 ~45-130-2	30
VX, VN, VD 45-10-1 ~ 45-90	25
VX, VN, VD 45-100-2 ~ 45-130-2	30

## Performance curve

Following conditions are suitable for the performance curves shown below:

1. All curves are based on the measured values of 50Hz: constant motor speed 2900rpm or 2950rpm.
2. Curve tolerance in conformity with ISO9906 Annex A.
3. Measurement is done with 20°C air-free water, kinematic viscosity of 1mm²/sec.
4. The operation of pump shall refer to the performance region indicated by the thickened curve to prevent over-heating due to too small flow rate or overload of motor due to too large flow rate.

## Curve illustration

Pump Q-H curve, the thickened line presents recommended performance region

Eta curve presents efficiency of the pump, for the pump equipped with small impeller. Its efficiency will be 2% lower than that shown by the curve

NPSH curve expresses the average value of all curves of this series. A safety margin of 0.5m shall be taken into consideration when making selection

## Minimum inlet pressure NPSH

In case that the pressure in pump is lower than the steam pressure used to convey liquid, the cavitations will occur. To avoid cavitations, a minimum pressure at the inlet side of the pump shall be guaranteed.

The maximum suction stroke can be calculated with following formula:  $H = Pb \times 10.2 - NPSH - H_f - H_v - H_s$   
 $Pb = \text{atmosphere pressure [bar]}$  (can be set as 1bar)

In a closed system,  $Pb$  means system pressure [bar]

$NPSH = \text{Net positive suction head [m]}$   
 (It can be read out from the point of possible max. Flow rate shown on NPSH curve)

$H_f = \text{Pipeline loss at the inlet [m]}$

$H_v = \text{Steam pressure [m]}$

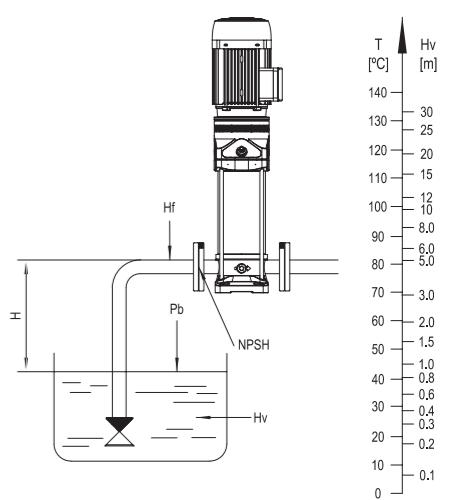

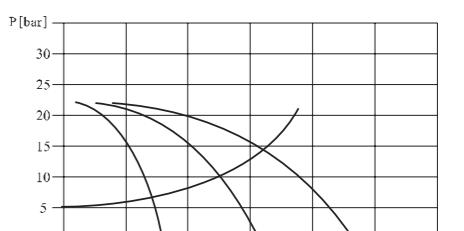

$H_s = \text{Safety margin} = \text{Minimum } 0.5\text{m delivery head}$

If the calculated result  $H$  is positive, the pump may run under the max. Suction stroke  $H$ .

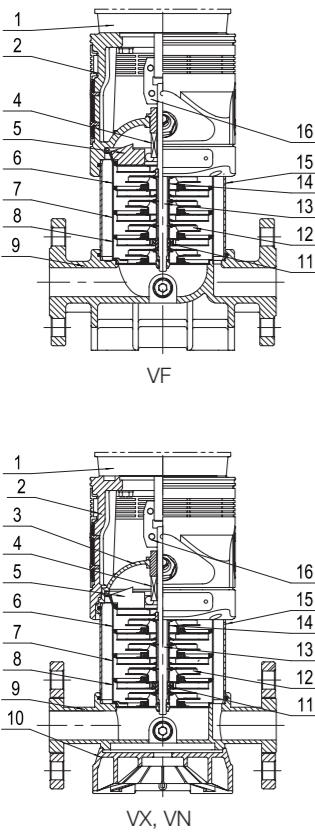

In case the calculated result  $H$  is negative, a delivery head of min. Inlet pressure is necessary.

Operation in parallel connecting several pumps in parallel running will benefit much more than running a single large pump.

Applicable to different working states necessary in a variable flow system. Increasing the possibility of water supply when the pump is in failure, because in case of pump failure, only part of the system flow is effected.

## Description

Single-phase or 3-phase pumps managed by INVERTER. General electrical supply is single-phase and 3-phase ~3x230 or ~3x400 Vac -depending on model. It can be mounted individually or in groups of 2 pumps communicated and operating in MASTER-SLAVE mode with alternated sequence of operation. It will be installed over connection box of the motor through a wide range of fastenings.

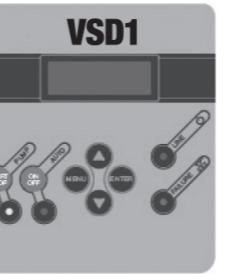

## Operating characteristics

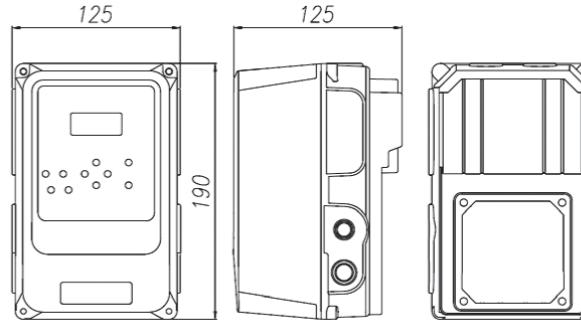

- Frequency inverter for the pump control.
- Adaptable to any connection box of the motor through a wide range of fastenings.
- ART function (Automatic Reset Test). If the device has been stopped due to the action of the safety system against dry operation, the ART tries to connect the pump, with a programmed periodicity because the water supply could have been restored.
- Automatic restore system after an interruption of power supply. System restores the previous state keeping the configuration parameters.
- Electronic input for detection of minimum water level in aspiration tank- optional-. This system is independent of the safety system against dry-running operation.
- Control and information panel with LCD screen.
- Output 4-20 mA for an external pressure transducer.

## Control Panel

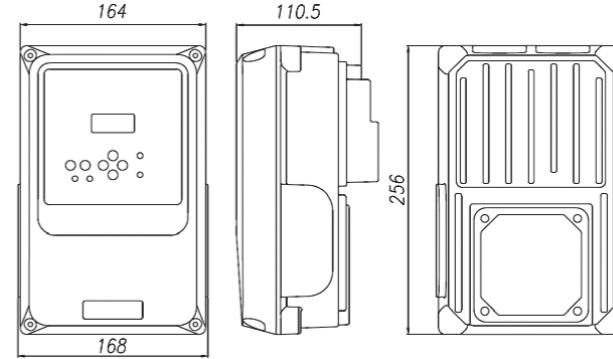

Control panel includes LCD screen, warning LEDs, push-buttons, START-STOP, AUTOMATIC and configuration system.

## Description

High-tech motor control concept, based on advanced DSP-technology V/Hz, SENSORLESS VECTOR, PMM synchronous motor control mode - SPEED / TORQUE control Intelligent AUTOTUNING functions for easy set-up. Rugged construction, all metal enclosure, thermally decoupled from motor, IP67 / NEMA4, shock proof (4G). Flexible configurable man/machine interface – fieldbus capability. Numerous functions, to make it suitable for all kind of industrial and residential applications, and for retrofit as well Smart PC-tools, for inverter control, parametrization and troubleshooting. Parameter-duplication stick. Approved for worldwide standards by independent bodies.

## Technical product data

<b>Power input</b>	Rated input voltage	3-Phase 380 - 460V +/- 15% 1-Phase 230/240V +/- 15%
	Input frequency	44....67 Hz
	EMC Filter	Integrated for 2. environment - industrial area (optional for residential area)
<b>Motor output</b>	Output voltage	0.....V-input
	Output frequency	0.....650 Hz (1500HZ OPITION)
	Frequency resolution	0,01 Hz
	Overload capability	150% - 60 sec. / 10 min
<b>Control Mode</b>	Motor control algorithm	V/Hz-SpaceVector - SLV-SENSORLESS Vector control - Torque/Speed control mode. CLV-Closed loop vector - Permanent Magnet Synchronous Motor PMSM SENSORLESS control.
	Chopper frequency	0.8...16 kHz (fixed / random)
	V/Hz curve	Linear, exponential, and user-programmable curve
	Starting torque	150% rated torque at 0,5 Hz (in SLV Mode)
	Torque compensation	Automatic / Manual
	Motor data input	Manual, from nameplate / AUTOTUNING
	Speed range	1:100 in SLV mode, 1:1000 in CLV mode, 1:20 in PMSM mode
	Speed precision	+/- 0,5% (SLV),+/- 0,02% (CLV)
	Torque precision	+/- 5% (SLV)
<b>Display</b>	DC-Brake	User programmable functions
	Brake chopper	Chopper transistor integrated (up to 22 kW)
	Character display	Config-Parameters and -value, programmable to display various working parameters
<b>I/O Channels</b>	Analogue channels	2 analogue channels - 12 BIT: 0...10V, 0...5V, -10V...0...10V, 0..(4)20 mA, all free scalable in gain and offset, and mathematically concatenable
	Analogue outputs	2 analogue outputs, programmable in gain and function (0...10V, 0(4)..20 mA)
	Digital outputs	1 switchover contact 5 A 230 V (programmable assignment)
	Relais output	2 analogue outputs, programmable in gain and function (0...10V, 0(4)..20 mA)
	Data link	Serial link RS 485 (MODBUS)
<b>Special functions</b>	Special functions	12V/50 mA auxiliary power supply on terminals, 10V potentiometer power supply, 5V/100 mA power supply on modbus connector PTC / KLIXON motor protection
<b>Electronic protections with fault history</b>	Electrical	Oversupply, undervoltage Overcurrent, overload, motor-overload, output short-circuit Input phaseloss, motor phase unbalance
	Thermal	Heatsink overtemperature, I2xt motorprotection
<b>Optionals</b>	Display	Remotable display / keypad units
	Brake chopper	Braking resistors for different load characteristics
	PC-software Parameter copy stick	Configuration-, control- an diagnosis-tool, parameter saving and duplicating For parameter duplicating
<b>Environmental and operating conditions</b>	Protection class	IP67 / NEMA4 motor/wall mountable
	Operating temperature	-10.....+50 °C - -40°C with automatic antifreeze control function (option)
	Humidity	0 to 95% RH, non-condensing, non-corrosive
	Altitude	1000 m, above: 1% derating / 100m
<b>Power range</b>	0,4.....15 kW	
<b>Standards</b>	Electromagnetic compatibility	EN61800-3(2004)
	Safety	EN61800-5-1 2003
